

Service version matrix

Services in Cleura Cloud are updated on a regular basis and on a rolling schedule.

This section lists the cloud API service versions available in each Cleura Cloud region.

- **Public Cloud**: versions running in our Cleura Public Cloud regions.
- **Compliant Cloud**: versions running in our Cleura Compliant Cloud regions.

OpenStack Services

OpenStack releases are named, in alphabetical order, and occur on a six-month release schedule. In Cleura Public Cloud we upgrade OpenStack releases annually; this means that we deploy every other OpenStack release and skip the intervening one.

Cleura Cloud currently runs OpenStack **Victoria** and **Xena**.

Ceph Services

Ceph major releases are also named, in alphabetical order, and occur on a roughly annual schedule.

Cleura Cloud currently runs Ceph **Nautilus** and **Pacific**.
