Start Here

This is the Cleura **Beta** documentation web site.

What does "Beta" mean?

The fact that this site is in a Beta stage means that any information you find here should be reliable and accurate for Cleura products and services. If you find any published documentation that is inaccurate or not in line with functionality as you observe it on Cleura, we would very much appreciate if you filed a documentation bug.

However, the documentation on this site may be incomplete, meaning that it does not yet cover *all* functionality available in Cleura.

In addition, page paths (URLs) are not yet stable. In other words, content may move from one path to another between visits. If you are looking for content that may have moved, please use the *Search* function.

We are currently in the process of migrating our Knowledge Base and other documentation to this site. If you want to help, here's how!

Site analytics and cookies

This site does not set cookies, which is why we also don't need to annoy you with a cookie consent banner. We use cookie-free site analytics from Plausible.
