S3 API

S3 is an object-access API based on HTTP and HTTPS.

In Cleura Cloud, you interact with the S3 API using either the `s3cmd` command-line interface (CLI), the MinIO client CLI (`mc`), or the standard `aws` CLI.

Either way, in addition to installing and configuring the Python `openstackclient` module, you need to install one of the aforementioned utilities.

Debian/Ubuntu	Mac OS X with Homebrew	Python Package

```
apt
install
s3cmd
aws

brew
install
minio-
mc
s3cmd

pip
install
s3cmd
```

⸱bility

⸱I is available in select Cleura Cloud regions. Refer to the feature ⸱atrix for details on S3 API availability.
